I'm a passionate and driven Full-Stack Developer with expertise in building scalable, secure, and user-centric web applications using modern technologies like React.js, Node.js, and Express.js. With a strong foundation in Data Structures, Algorithms, and Software Engineering principles, I've built full-stack projects, designed CRUD APIs, and worked with databases like MongoDB.

Volunteer

- **Member** Jul 2025 - Present
She Builds AI Discovery
- **Member** May 2024 - Present
Women Techmakers

Awards

- **WebWizards 2nd RunnerUp** Apr 2025
Participated in WebWizards, tech event and built a sleek web app to support small businesses. We integrated features like GPS, backend support, and a modern UI.

Core Skills

Critical Thinking, Time Management, ReactJS, NodeJS, ExpressJS, JavaScript, Python, Java, HTML CSS, Tailwind CSS, MongoDB, Git, GitHub, Data Structures and Algorithms, RESTful API

Certificates

- **Leetcode 50 days of coding**
- **Ideathon** - JSS Academy of Technical Education
- **API Fundamental Student Expert**- Postman
- **IBM Z Skills Certificate**
- **Microsoft security bootcamp**
- **Responsive Web Design** FreeCodeCamp
- **Python Certificate** - HackerRank

Education

- **JSS Academy of Technical Education Karnataka** Sep 2023 - Present
BE Computer Science and Engineering

Work Experience

- **Machine Learning Intern** Jul 2025-Sep 2025
Princeton Smart Engineers
- **Front End Web Development Intern** Sep 2025- Oct 2025
Edunet Foundation
- **Solutions Architect Job Simulation** Jun 2025 - Jun 2025
Amazon Web Services (AWS)
- **Contributor** Jan 2025 - Mar 2025
Social Winter of Code (SWOC)
- **Contributor** Oct 2024 - Nov 2024
GirlScript Summer of Code

Projects

- **RAG Chatbot:** I worked on RAG(Retrieve-Answer-Generate) chatbot which enriched my knowledge in NLP (natural language processing) and conversational AI.
- **FoodDel:** I have developed a food delivery app which uses MERN stack (MongoDB, Express.js, React, Node.js), enabling users to browse restaurants, place orders, and track deliveries in real-time.
- **Image Classifier:** I have built an Image Classifier ML model using CNN, integrated with a React frontend and a backend powered by Express.js and FastAPI.
- **Wsafe:** Developed a women's safety application using a full-stack MERN architecture. The project leverages React.js, Vite, and Tailwind CSS for a responsive front end, with a Node.js/Express.js backend and MongoDB for robust data management.
- **MultiGame:** Developed a suite of interactive mini games including N-Queen, Sudoku, and Memory Game using React.js and JavaScript, with a strong emphasis on smooth gameplay and user-centric design.
